PROJECT

STAGWORKS   Aug 2024 - Present

STAGWORKS CRM is a feature-rich platform for content management, networking, and information sharing, enabling seamless management of products, services, and workflows. Built with **ReactJS**, **TypeScript**, and **TailwindCSS**

Role: As a Web Developer, I focused on the frontend, creating scalable UI components, optimizing performance, and managing updates using React Hook Form, Zod, and Git.

Public Local Transport Guider 🔗   Aug 2023 - Feb 2024

A cross-platform app built with React Native Expo for route recommendations, fare estimation, and travel time prediction using custom-trained LLMs on local transport data. Technologies include **Express.js, Python, FlaskAPI, Google Maps API, MongoDB, Styled Components, and Git.**

Role: Responsible for front-end development, ensuring smooth UI/UX, API integration, and testing. Contributed to training LLMs with custom local transport data on the backend.
