PROFILE

Fullstack Engineer specializing in scalable data extraction and automation systems, with strong expertise in Python and Node.js. Experienced in system design, building resilient architectures, and delivering scalable solutions within production-grade cloud environments. Skilled in deploying, monitoring, and optimizing distributed systems, with experience integrating AI-driven workflows and intelligent automation to improve performance, reliability, and data processing at scale.

EXPERIENCE

Fullstack Engineer

May 2025 - Present

MrScraper | Los Angeles, United States

- Collaborate with R&D, AI platform, and enterprise teams to build scalable data pipelines handling millions of records per day and supporting AI and analytics workloads.
- Design and maintain reliable scraping systems using reverse engineering, adaptive orchestration, and anti-bot techniques, extracting millions of structured data points daily from dynamic, protected sources.
- Reduce infrastructure costs by 25–40% and minimize system failures by improving legacy pipelines, fixing bugs, and replacing external dependencies with optimized internal services.

Web Developer

Jul 2024 - May 2025

Powerful Web Design | Portland, United States

- Enhanced CRM platform with innovative ai features and optimized performance under tight deadlines.
- Managed full web app lifecycle with updates reducing maintenance costs by 11% through agile collaboration.
- Optimized front-end performance via monitoring and testing, cutting load times by 25%.
- Skills:ReactJS,NextJS,Typescript, TailwindCSS, Tanstack, React Hook Form, Zod,Github Actions,Git,GenAI Integrations

Mobile App Developer

Jan 2024 - Jun 2025

Hyse Tech Pvt Ltd | Islamabad, Pakistan

- Developed & Published "Charter," a React Native app for the educational sector for a KSA client with 3+ team members.
- Integrated seamless navigation, robust APIs, course listings, authentication, and payment gateways.
- Optimized performance through testing, reducing debugging time by 10%
- Skills:React-Native-Cli, Redux, JavaScript, Bitbucket, Jira, Custom Component Development, Api Integration, GraphQL, Stripe,Git

EDUCATION

Bachelor's Degree, Computer Science

2024

Comsats University Islamabad | Pakistan

SKILLS

Javascript | Typescript | Object Oriented Programming (OOP/OOD) | Enterprise Level Services Developer

LANGUAGES

English — Fluent

Urdu — Fluent
